

Scenario: most probable	before September	
		Sep
fodder availability		no pasture in Ke some in L Juba,
flooding		
Water		river water pans dry, many sh boreholes overworked,
Livestock		cattle condition v poor v little cattle or goat milk
Health (human)		
Migration		nearly all cattle in L Juba (Som)
HOUSEHOLD economy		grain on
Interventions needed		

Star-up deadlines for many proposed interventions has already passed. These can no longer be undertaken on time and may have to be cancelled.

oct 1-15	oct 16-31	Nov 1-15	Nov, 16-30	Dec, 1-15	Dec, 16-31
	rains from mid Oct				
browse only close to river	washed away with first rains	regeneration of pasture			
		roads difficult to pass mosquitos increase	floods		
			displacement - settlements flooded - loss of shoats - loss of irrigated farming		
limited allow wells dry pump breakdowns	water available		destruction & silting of pans (worse in Somalia)		
cattle and shoat mortality	cold shock (1st rains)	foot rot?	foot rot?	Rift Valley Fever	
	shoat and calf death		pneumonia	1st conceptions of cattle/shoats	
water borne diseases (lack of safe water)			malaria cholera/WBD (in shallow well and pan areas)		
	migration home				
credit		trade disrupted.		possible quarantine (RVF) milk & l'stock prices crash	
		Low food availability in inaccessible areas very high food prices - + 200-300%			

p RVF)	support for increased activity drugs prepositioned before floods
